

Commercial Inspection Program

Bellefonte Borough

- Discuss research materials being utilized, codes being referenced
- Public input from property owners and shopkeepers will make the program a success from the start
- In conjunction with the Safety Committee, review and suggest options for the inspections
- Fire safety includes educating the public, not just arming the buildings with defense mechanisms
- How do we educate? Newsletter? Use volunteer fire companies for developing ideas.

Background information

Presently working on:

Review neighboring municipalities commercial inspection programs

Create preliminary draft of ordinance

Approximate timeline to implementation

Invite local business and property owners to review draft of ordinance

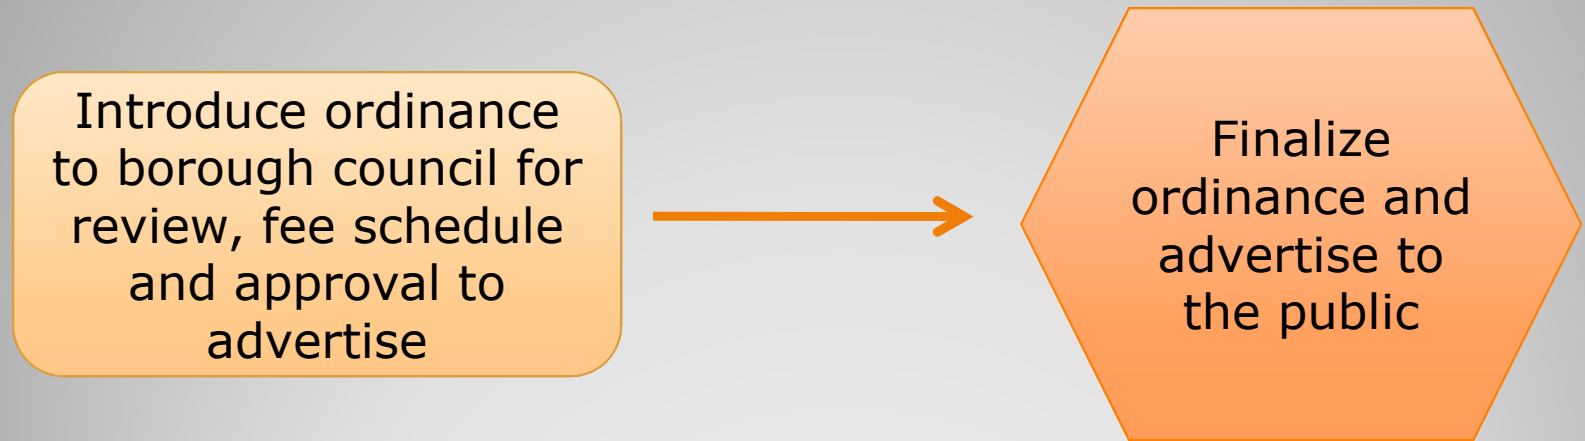

Use public input to finalize draft

Timeline

June-July 2010
